

Updating Check Printer Version

v1.0

How to Update Check Printer Version

When an Exigo programmer has advised you that a new version of the check printer module is available and you should update your version.

Here are the steps to follow:

- Using your computer's file explorer, go to **C:/programfiles/Exigo**.
- Find the folder(s) with numbers like 5.0.14.89.
- Double click on the **highest number/ version folder**.
- Then find the file **Exigo Update (application)** and **double click to run it**.
- A black box will open and show that it is updating files.
- When you **run the Check Printer program from your Start menu**, you should notice a **new version number** at the top left of the Check Printing Wizard screen after you login.
